

Profile Summary

Full-stack developer building production SaaS, ERP and AI products end to end — Flask/FastAPI backends, Next.js/React and Flutter frontends, PostgreSQL/MySQL data models, LLM integrations and AWS deployments.

Experience

Full-Stack Developer Oct 2024 – Present
SGHS Global Pvt. Ltd. / SymConverge Ahmedabad, Gujarat

- NLS — B2B footwear manufacturing ERP/CRM** (Next.js 16, React 19, Tailwind, Flask, PostgreSQL, Celery, Redis, Socket.IO, AWS S3)
- Core developer on a B2B custom-footwear manufacturing ERP covering leads → quotations → sales orders → production → invoicing, spanning a 300+ endpoint Flask API and a 500+ component Next.js admin dashboard.
 - Built the quotation-to-order workflow (approve/reject, editable quotes, void/delete with audit trails) and pricing and billing features — distributor pricing, price overrides, discounts, shipping charges and coupons through to invoices.
 - Shipped RBAC with custom roles and a permission catalog, integrated QuickBooks Online and Cirro/eLogistic shipping, and built sizing-kit/bundle ordering, product customization with S3 uploads, and Recharts reporting dashboards.

- Stylist — AI styling & product recommendation engine for e-commerce** (FastAPI microservices, Gemini, Fashion-CLIP, Elasticsearch, MySQL, Celery, OpenCV, Docker)
- Built the virtual try-on service (FASHN API integration, person-image upload pipeline, style-passport lookup) and the Gemini-driven tag-extraction service with OpenCV colour and silhouette extractors, behind a platform-agnostic abstraction reused across Shopify and WooCommerce catalogs.
 - Instrumented storefront search-query logging with Celery-backed analytics to improve recommendation quality.

- Databook — AI natural-language reporting SaaS over Cin7Core inventory** (FastAPI, Anthropic Claude API, Firebase Auth/Firestore, MySQL, React 19, TanStack Start, Docker)
- Started both services for an AI natural-language reporting SaaS over Cin7Core (DEAR) inventory data — a Claude-powered agent turning plain-English questions into API queries and charted, exportable reports.
 - Built FastAPI routers (auth, Cin7 connect, report agent, templates, uploads, Razorpay billing) and a TanStack Start + shadcn frontend; containerized with Docker and deployed via GitHub Actions to AWS ECR.

- ClosetCrew (formerly S.AI) — AI fashion-tech platform, mobile + backend** (Flutter, Flask, Gemini API, FAISS, Firebase, Celery, Redis, AWS EC2/S3)
- Led full-stack development of the mobile app and backend: AI outfit, body-type and colour analysis and product recommendations using the Gemini API with FAISS vector search, plus large-scale product scrapers, a Celery/Redis ranking service, S3 storage, EC2 deployments and payment checkout.

Symmatric & Moncware: built an AI caption-generation system and secure password hashing for a social platform; designed authentication, partner API (logistics, billing) and payment modules (Razorpay, Zoho Billing) plus admin dashboards and customer portals in Flutter Web and Node.js.

Data Science Intern Apr 2024
Brainybeam Info-Tech Pvt. Ltd. Ahmedabad, Gujarat

- Analyzed e-commerce customer behaviour in Python to identify engagement drivers and retention patterns, informing UX improvements.

Education

B.Tech in Computer Engineering, Indus University (2025) — CGPA: 9.53
12th: 95.4% (2021) | 10th: 98.5% (2019), Army Public School, Ahmedabad

Skills

Languages & Frameworks: Python, JavaScript, TypeScript, Dart, SQL, Flask, FastAPI, Next.js, React, Flutter, Node.js, Celery, Tailwind CSS
Databases & Search: PostgreSQL, MySQL, MongoDB, Redis, Elasticsearch, Firestore
Cloud & DevOps: AWS (EC2, S3, ECR), Docker, Terraform, GitHub Actions CI/CD, Vercel, Cloudflare, Git
AI/ML: Claude API, Gemini API, LLaMA-3, Fashion-CLIP embeddings, FAISS vector search, recommendation systems, OpenCV
Integrations: Stripe, Razorpay, Zoho Billing, QuickBooks Online, Shopify & WooCommerce APIs, shipping & logistics APIs, Google OAuth/Gmail, Firebase Auth, Socket.IO

Projects & Certifications

Dressly (2024) — Virtual wardrobe with AI outfit recommendations, PostgreSQL backend and LLaMA-3 styling chatbot.
AgroRishi (Hackout’24, DA-IICT) — IoT farming assistant with sensor data, ML crop-health analysis and a multilingual chatbot.
Certifications: AWS Cloud Computing (IITE), Complete Data Science Bootcamp, Python & Flask, Data Manipulation in Python (Udemy)
